Product Details

Product Name: Paracetamol 500mg Tablets

Dosage Form: Tablet

Product Category: Finished Dosage Form (FDF)

Manufacturer: ABC Pharma Ltd.

Batch Number: PCM2026001

Manufacturing Date: June 2026

Expiry Date: May 2028

Complaint Description

I purchased one strip of **Paracetamol 500mg Tablets** from a nearby pharmacy.

After opening the blister pack, I noticed that several tablets were broken into small pieces. Powder was present inside the blister cavity, and the aluminum foil appeared slightly damaged.

The medicine appears to have been damaged before reaching the customer. This raises concerns about product quality and packaging integrity.

Since the tablets are broken, I am not confident that they are safe to consume. I request the company to investigate **Batch Number PCM2026001**, identify the root cause of the issue, and take corrective and preventive actions (CAPA) to prevent similar incidents in future batches.

Expected Action

- Investigate the affected batch.
 - Inspect the packaging line.
 - Perform a quality assurance review.
 - Replace the defective product.
 - Inform the customer about the investigation outcome.
 - Implement appropriate CAPA measures.
-

Additional Remarks

The damaged blister pack and photographs can be provided upon request for further investigation.
